

Pineline Fusion Ceramic Advance

Art.nr.	870
Description	A ceramic WetCoat spray sealant developed for do-it-yourself (DIY) car washes to protect the car's exterior, glass and metal surfaces.
Special features	The SiO ₂ structure of the product offers long-lasting protection and repellency against dirt. The coating retains its properties even after several washes. Thanks to its excellent hydrophobicity and slickness, dirt is easily washed off from surfaces. The gloss also deepens.
Instructions for use	After careful washing, the product is applied to wet surfaces. Recommended consumption: 100 – 200 ml / passenger car Advanced concentration: 3 – 5 %. Activating after treatment with water, after which the car is dried. If reverse osmosis (RO) water is used for activation, the car does not need to be dried separately.
Note!	Read the instructions for safe use on the label or safety data sheet. Store sealed at +5...+30 °C.
Working environment	Provide adequate ventilation.
Technical data	Form and colour green liquid pH-value (+20 °C) 5,2 Relative density 1
Content	Polyorganic siloxanes 5 – 15 %
Package	10 L, 25 L. Empty and rinsed packaging shall be delivered to plastic collection.
Other	Made in Finland.
